

Remove old canopy

1. Close the umbrella
2. Remove the top cap
3. Pull the canopy pockets gently from the ribs

Apply new canopy

4. Place the new PEP Trade canopy over the frame
5. Return the top cap back
6. Insert the ribs back into the pockets

Our 'ready-made' canopies are also very suitable for round **CANTILEVER** frames (see manual on our site).

Attention!

It is possible that the ribs of some models are too long. This can be easily solved by adjusting (cutting) the length of the ribs the right size. The ideal size is when the ribs fit $\frac{2}{3}$ into the pockets when the umbrella is closed.

Pointer!

You will get the best result (without crease or fold) when ironing the canopy first. The recommended position for your iron is "cotton".

Have a great summer

THE PEP TRADE TEAM
